Box I	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)	
This interressons:	national search report has not been established in respect of certain claims under Article 17(2)(a) for the following	
1.	Claims Nos :	
	because they relate to subject matter not required to be searched by this Authority, namely:	
2.	Claims Nos: 25 and 26 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:	
3.	Claims Nos: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)	
Box II	Observations where unity of invention is lacking (Continuation of item 3 of first sheet)	
1	national Searching Authority found multiple inventions in this international application, as follows: upplemental Box.	
1. [As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims	
2. [As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.	
3. [As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: Claims 1, 2, 12 to 24.	
4. [No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:	í
Remark o	on Protest The additional search fees were accompanied by the applicant's protest.	•
	No protest accompanied the payment of additional search fees.

Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

Continuation of Box No: II

Claims 1, 2, 12 to 15 (depending from claim 1) relate to a packet format and a method using that format including a list of neighbouring devices and corresponding timeslots.

Claims 3 to 9 and 11 (depending from claim 3 difficult to resolve dependency) relate to a method of date encoding without any reference to neighbouring devices or corresponding timeslots.

Claims 10 and 11 (depending from claim 10 difficult to resolve dependency) relate to a method of synchronising devices within a network without any reference to neighbouring devices or corresponding timeslots.

Claims 16 to 24 relate to a protocol for dynamically expanding a network without any reference to neighbouring devices or corresponding timeslots. The protocol includes a number of states sleep, wake up, scan, listen, normal and network. In the normal state a device is allocated a timeslot without being synchronised to other devices and transmits in alternate of its timeslots.

International application No.

Information on patent family members

PCT/SG2003/000293

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.

Patent Document Cited in Search Report			Patent Family Member				
US	5719868						
US	6317436	US	6331973	US	2003067906		

Due to data integration issues this family listing may not include 10 digit Australian applications filed since May 2001.
